

Southwest Airlines Reports First Quarter 2025 Results

DALLAS, TEXAS - April 23, 2025 - Southwest Airlines Co. (NYSE: LUV) (the "Company") today reported its first quarter 2025 financial results:

- Net loss of \$149 million, or \$0.26 loss per diluted share
- Net loss, excluding special items¹, of \$77 million, or \$0.13 loss per diluted share
- Record first quarter operating revenues of \$6.4 billion on all-time record yields
- Liquidity² of \$9.3 billion, well in excess of debt outstanding of \$6.7 billion

Bob Jordan, President, Chief Executive Officer, & Vice Chairman of the Board of Directors, stated, "While the broader economic environment has been dynamic, we remain focused on executing our transformational plan. On costs, we beat our previously adjusted guidance and are on track to achieve the increased cost reduction plan targets announced last month. We ran a stellar operation in first quarter, leading the industry in ontime performance and improving on almost every operating metric, year-over-year. We are seeing positive results on recently rolled out initiatives, including the launch of Expedia as a new distribution channel and the further optimization of our loyalty program. We expect to introduce basic economy and bag fees for most fare products next month and remain on track to begin selling assigned and extra legroom seats in third quarter 2025 for operation beginning in first quarter of next year.

"We are evolving at Southwest Airlines, more than ever before. The initiatives we have laid out are expected to improve our commercial offering and financial performance, providing value for both Customers and Shareholders. We remain well-positioned with and committed to a strong and efficient investment-grade balance sheet and have a valuable contractual order book with Boeing that offers flexibility. Looking ahead, we are confident in the initiatives we have outlined and the value we expect them to produce. We are committed to executing on these plans while controlling what we can control. To that end, we are reducing capacity in the second half of this year. These incremental schedule adjustments are in progress, and based on current estimates, we now expect our full year 2025 capacity to be up roughly one percent, year-over-year. As always, I am proud of our People, their resiliency, and operational performance and unique Southwest Hospitality they are delivering for our Customers."

Guidance and Outlook:

The following tables provide select financial guidance for second quarter 2025, as well as select full year 2025 and 2026 targets. Amid the current macroeconomic uncertainty, it is difficult to forecast given recent and short-lived booking trends. As such, the Company is not reiterating its full year 2025 or 2026 EBIT³ guides. However, the Company remains confident in and committed to continued strong execution of its initiatives and is reaffirming its targets of \$1.8 billion full year 2025 and \$4.3 billion full year 2026 incremental EBIT³ contribution from those initiatives.

	2Q 2025 Estimation
RASM (a), year-over-year	Flat to down 4%
ASMs (b), year-over-year	Up 1% to 2%
Fuel cost per gallon ^{1,4}	\$2.20 to \$2.30
ASMs per gallon (fuel efficiency)	82 to 83
CASM-X (c), year-over-year ^{1,5}	Up 3.5% to 5.5%
Scheduled debt repayments (billions) (d)	~\$2.6
Interest expense (millions)	~\$39

	2025 Target	2026 Target
EBIT ³ contribution from initiatives (billions)	~\$1.8	~\$4.3

(a) Operating revenue per available seat mile ("RASM" or "unit revenues").

(b) Available seat miles ("ASMs" or "capacity").

(c) Operating expenses per available seat mile, excluding fuel and oil expense, special items, and profit sharing ("CASM-X" or "unit costs").

(d) Includes a \$976 million prepayment made on April 17, 2025 for the first tranche of the Payroll Support Program notes.

Key Initiative Highlights:

- Outperformed first quarter unit cost guidance
- Accelerated cost reduction plan, increasing 2025 target to approximately \$370 million and 2027 run rate cost savings to over \$1.0 billion
- Continued revenue management improvements, producing all-time quarterly record yields
- Expanded distribution to online travel agencies with the launch of Expedia, with current performance ahead of expectations
- Optimized loyalty program to better align earn rates to fare paid and dynamically manage redemption rates
- Reached amended co-brand agreement with Chase and had record first quarter spend on the Company's co-brand credit card

- Received necessary approvals and certifications to begin extra legroom seating retrofits on Boeing 737-8 ("-8") and Boeing 737-800 ("-800") aircraft
- Reduced turn time now in place at 19 airports
- Repurchased \$1.0 billion against previously announced \$2.5 billion share buyback and expect to complete remaining \$1.5 billion by the end of July 2025

Revenue Results and Outlook:

- First quarter 2025 operating revenues were a first quarter record of \$6.4 billion, a 1.6 percent increase, year-over-year
- First quarter 2025 passenger revenues were a first quarter record of \$5.8 billion, a 1.7 percent increase, year-over-year
- First quarter 2025 co-brand card spend was a first quarter record
- First quarter 2025 RASM increased 3.5 percent, year-over-year—above the midpoint of the Company's previous guidance range

The Company had a record first quarter performance for operating revenues, passenger revenues, other revenues, and an all-time record yield performance. These results were driven primarily by yield improvements from revenue management actions and capacity moderation. Results were impacted as demand weakened throughout the quarter, driving softness in bookings, particularly in domestic leisure travel, where the Company is currently more heavily weighted compared with larger industry peers.

The Company expects second quarter 2025 unit revenues to be in the range of flat to down 4 percent on capacity in the range of up 1 percent to 2 percent, both on a year-over-year basis. This guidance range contemplates benefits from continued execution of Company-specific initiatives, offset by softness in the demand environment. Thus far, the Company has seen no evidence of book-away following its recent announcement of policy changes, including flight credit expiration and checked bag fees. The Company's second quarter guidance assumes current trends will persist through the remainder of the quarter.

Non-Fuel Costs and Outlook:

- First quarter 2025 operating expenses decreased 1.1 percent, year-over-year, to \$6.7 billion
- First quarter 2025 operating expenses, excluding fuel and oil expense, special items, and profit sharing¹, increased 2.6 percent, year-over-year

- First quarter 2025 CASM-X increased 4.6 percent, year-over-year—better than the Company's revised guidance of up approximately 6 percent driven by cost efficiencies in multiple areas across the organization

The Company anticipates second quarter 2025 CASM-X to increase in the range of 3.5 percent to 5.5 percent, year-over-year, driven primarily by the continuation of inflationary pressures, including those associated with labor contracts ratified in 2024. The Company remains focused on driving efficiencies to offset overall inflationary cost pressures and achieve its accelerated cost initiative targets.

Capacity, Fleet, and Capital Spending:

- First quarter 2025 capacity decreased 1.9 percent, year-over-year—in line with the Company's previous guidance
- The Company received 11 -8 aircraft and retired 14 aircraft (12 Boeing 737-700 ("-700") aircraft and 2 -800 aircraft) in first quarter 2025, ending the quarter with 800 aircraft
- First quarter 2025 capital expenditures were \$501 million, driven primarily by aircraft-related capital spending, as well as technology, facilities, and operational investments. Capital expenditures for the quarter were offset by proceeds of \$24 million from the sale-leaseback of one aircraft

The Company is now proactively reducing capacity in the second half of 2025 to accommodate a lower demand environment and capture associated cost savings. While schedules are not final, the Company expects to reduce both third quarter and fourth quarter capacity by roughly one and one-half points and anticipates that full year 2025 capacity will now be up roughly 1 percent, year-over-year, which would be on the low end of the prior expectation of up 1 percent to 2 percent, year-over-year. This modest growth is driven entirely by an increase in aircraft utilization provided by redeye flying and turn time reduction initiatives.

The Company is not making any material updates to its fleet assumptions, including aircraft delivery and retirement expectations, at this time. The Company will continue to evaluate the potential for fleet transactions on an opportunistic basis.

The Company continues to expect its 2025 capital spending to be in the range of \$2.5 billion to \$3.0 billion, which does not include the impact of potential future fleet transactions. These transactions could lower the Company's net capital spending if executed.

Liquidity and Capital Deployment:

- The Company remains committed to a strong and efficient balance sheet with an investment-grade credit rating
- The Company ended first quarter 2025 with \$8.3 billion in cash and cash equivalents and short-term investments, and a fully available revolving credit line of \$1.0 billion
- The Company continues to have a large base of unencumbered aircraft and primarily aircraft-related assets with a net book value of approximately \$16.3 billion
- The Company had a net cash position⁶ of \$1.6 billion as of March 31, 2025
- The Company returned \$857 million to its Shareholders during first quarter 2025, comprised of \$107 million of dividends and \$750 million of share repurchases
- The Company has repurchased \$1.0 billion under its previously announced \$2.5 billion share repurchase authorization. The Company expects to complete the repurchase of the remaining \$1.5 billion by the end of July 2025

Fuel Costs and Outlook:

- First quarter 2025 economic fuel costs were \$2.49 per gallon¹—above the Company's previous guidance range
- First quarter 2025 fuel efficiency improved 2.6 percent, year-over-year, primarily due to operating more -8 aircraft, the Company's most fuel-efficient aircraft, as a percentage of its fleet
- As of April 15, 2025, the fair market value of the Company's fuel derivative contracts settling in second quarter 2025 through the end of 2027 was an asset of \$54 million

The Company has discontinued its fuel hedging program and has no plans to add additional derivatives to its portfolio, which currently extends through 2027. The Company's current fuel derivative contracts contain a combination of instruments based on Brent crude oil. The economic fuel price per gallon sensitivities⁴ provided in the table below assume the relationship between Brent crude oil and refined products based on market prices as of April 15, 2025.

Average Brent Crude Oil price per barrel	Estimated economic fuel price per gallon, including taxes and fuel hedging premiums
	2Q 2025
\$40	\$1.40 - \$1.50
\$50	\$1.70 - \$1.80
Current Market (a)	\$2.20 - \$2.30
\$70	\$2.40 - \$2.50
\$80	\$2.70 - \$2.80
\$90	\$3.00 - \$3.10
\$100	\$3.20 - \$3.30
Fair market value of fuel derivative contracts settling in period	\$—
Estimated premium costs	\$37 million

(a) Brent crude oil average market price as of April 15, 2025, was \$64 per barrel for second quarter 2025.

In addition, the Company is providing its maximum percentage of estimated fuel consumption⁷ covered by fuel derivative contracts in the following table:

Period	Maximum fuel hedged percentage (a)	Estimated premium costs
2025	47%	\$148 million
2026	43%	\$135 million
2027	13%	\$40 million

(a) Based on the Company's current available seat mile plans. The Company is currently 45 percent hedged in second quarter 2025 and 46 percent hedged in second half 2025.

Supplemental Information:

The Company has provided a summary on progress against initiative development on the Investor Relations website at <https://www.southwestairlinesinvestorrelations.com>.

Conference Call:

The Company will discuss its first quarter 2025 results on a conference call at 12:30 p.m. Eastern Time on April 24, 2025. To listen to a live broadcast of the conference call, please go to <https://www.southwestairlinesinvestorrelations.com>.

Footnotes

¹See Note Regarding Use of Non-GAAP Financial Measures for additional information on special items. In addition, information regarding special items and economic results is included in the accompanying table Reconciliation of Reported Amounts to Non-GAAP Measures (also referred to as "excluding special items").

²Includes \$8.3 billion in cash and cash equivalents and short-term investments, and a fully available revolving credit line of \$1.0 billion.

³A non-GAAP financial measure calculated as earnings before interest and taxes, excluding special items ("EBIT"). EBIT (a) excludes annual average of \$400 million to \$500 million for fleet initiative over the three-year period from 2025 to 2027, (b) assumes profit sharing of 15 percent, and (c) assumes a fuel price of ~\$2.33 per gallon in 2025 and 2026. Projections do not reflect the potential impact of special items because the Company cannot reliably predict or estimate those items or expenses or their impact to its financial statements in future periods. Accordingly, the Company believes a reconciliation of non-GAAP financial measures to the equivalent GAAP financial measures for these projected results is not meaningful or available without unreasonable effort.

⁴Economic fuel cost per gallon ("Fuel cost per gallon") includes fuel taxes, fuel hedging premium expense, and any related cash settlements from fuel derivative contracts. Based on the Company's existing fuel derivative contracts and market prices as of April 15, 2025, second quarter 2025 economic fuel costs per gallon were estimated to be in the range of \$2.20 to \$2.30, including fuel hedging premium expense of \$0.06 per gallon and no cash settlements from fuel derivative contracts. Economic fuel cost projections do not reflect the potential impact of special items because the Company cannot reliably predict or estimate the hedge accounting impact associated with the volatility of the energy markets, or the impact to its financial statements in future periods. Accordingly, the Company believes a reconciliation of non-GAAP financial measures to the equivalent GAAP financial measures for projected results is not meaningful or available without unreasonable effort. See Note Regarding Use of Non-GAAP Financial Measures.

⁵Projections do not reflect the potential impact of fuel and oil expense, special items, and profit sharing because the Company cannot reliably predict or estimate those items or expenses or their impact to its financial statements in future periods, especially considering the significant volatility of the fuel and oil expense line item. Accordingly, the Company believes a reconciliation of non-GAAP financial measures to the equivalent GAAP financial measures for these projected results is not meaningful or available without unreasonable effort.

⁶Net cash position is calculated as the sum of cash and cash equivalents and short-term investments, less the sum of short-term and long-term debt.

⁷The Company's maximum fuel hedged percentage is calculated using the maximum number of gallons that are covered by derivative contracts divided by the Company's estimate of total fuel gallons to be consumed for each respective period. The Company's maximum number of gallons that are covered by derivative contracts may be at different strike prices and at strike prices materially higher than the current market prices. The volume of gallons covered by derivative

contracts that are ultimately exercised in any given period may vary significantly from the volumes used to calculate the Company's maximum fuel hedged percentages, as market prices and the Company's fuel consumption fluctuate.

Cautionary Statement Regarding Forward-Looking Statements

This news release contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Specific forward-looking statements include, without limitation, statements related to (i) the Company's initiatives, strategic priorities and focus areas, goals, and opportunities, including with respect to its transformational plan, commercial offering, financial performance, providing value for Customers and Shareholders, and driving cost efficiencies; (ii) the Company's plans and expectations with respect to basic economy fares, bag fees, assigned seating, extra legroom seating, and the Company's loyalty program; (iii) the Company's plans and expectations with respect to its balance sheet; (iv) the Company's fleet plans and expectations, including with respect to its fleet order book, fleet utilization, fleet retrofits, fleet modernization, fleet transactions, flexibility, and expected fleet deliveries and retirements, and including factors and assumptions underlying the Company's plans and expectations; (v) the Company's financial and operational outlook, expectations, goals, plans, and projected results of operations, including with respect to its initiatives, and including factors and assumptions underlying the Company's expectations and projections; (vi) the Company's capacity plans and expectations; (vii) the Company's expectations with respect to fuel costs and fuel efficiency, and the Company's related management of risks associated with changing jet fuel prices, including factors underlying the Company's expectations; (viii) the Company's plans, estimates, and assumptions related to repayment of debt obligations, interest expense, and capital spending, including factors and assumptions underlying the Company's expectations and projections; (ix) the Company's planned shareholder returns; and (x) the Company's plans and expectations with respect to redeye flying and reducing turn times. These forward-looking statements are based on the Company's current estimates, intentions, beliefs, expectations, goals, strategies, and projections for the future and are not guarantees of future performance. Forward-looking statements involve risks, uncertainties, assumptions, and other factors that are difficult to predict and that could cause actual results to vary materially from those expressed in or indicated by them. Factors include, among others, (i) the impact of fears or actual outbreaks of diseases, extreme or severe weather and natural disasters, actions of competitors (including, without limitation, pricing, scheduling, capacity, and network decisions, and consolidation and alliance activities), governmental actions, consumer perception, consumer uncertainties with respect to trade policies (including the imposition of tariffs), economic conditions, banking conditions, fears or actual acts of terrorism or war, sociodemographic trends, and other factors beyond the Company's control, on consumer behavior and the Company's results of operations and business decisions, plans, strategies, and results; (ii) the Company's ability to timely and effectively implement, transition, operate, and maintain the necessary information technology systems and infrastructure to support its operations and initiatives, including with respect to revenue management and assigned and premium seating; (iii) consumer behavior and response with respect to the Company's new commercial products and policies; (iv) the impact of fuel price changes, fuel price volatility, volatility of commodities used by the Company for hedging jet fuel, and any changes to the Company's fuel hedging strategies and positions, on the Company's business plans and results of operations; (v) the Company's dependence on The Boeing Company ("Boeing") and Boeing suppliers with respect to the Company's aircraft deliveries, Boeing MAX 7 aircraft certifications, fleet and capacity plans, operations, maintenance, strategies, and goals; (vi) the Company's dependence on the Federal Aviation Administration with respect

to, among other things, the certification of the Boeing MAX 7 aircraft; (vii) the Company's dependence on other third parties, in particular with respect to its technology plans, its plans and expectations related to revenue management, online travel agencies, operational reliability, fuel supply, maintenance, Global Distribution Systems, environmental sustainability, and the impact on the Company's operations and results of operations of any third party delays or nonperformance; (viii) the Company's ability to timely and effectively prioritize its initiatives and focus areas and related expenditures; (ix) the impact of labor matters on the Company's business decisions, plans, strategies, and results; (x) the impact of governmental regulations and other governmental actions on the Company's business plans, results, and operations; (xi) the Company's ability to obtain and maintain adequate infrastructure and equipment to support its operations and initiatives; (xii) the Company's dependence on its workforce, including its ability to employ and retain sufficient numbers of qualified Employees with appropriate skills and expertise to effectively and efficiently maintain its operations and execute the Company's plans, strategies, and initiatives; (xiii) the cost and effects of the actions of activist shareholders; and (xiv) other factors, as described in the Company's filings with the Securities and Exchange Commission, including the detailed factors discussed under the heading "Risk Factors" in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2024.

Aircraft at end of period	800	819	(2.3)

(a) A revenue passenger mile is one paying passenger flown one mile. Also referred to as "traffic," which is a measure of demand for a given period.

(b) An available seat mile is one seat (empty or full) flown one mile. Also referred to as "capacity," which is a measure of the space available to carry passengers during a period.

(c) Revenue passenger miles divided by available seat miles.

(d) Seats flown is calculated using total number of seats available by aircraft type multiplied by the total trips flown by the same aircraft type during a particular period.

(e) Seats per trip is calculated by dividing seats flown by trips flown.

(f) Calculated as passenger revenue divided by revenue passenger miles. Also referred to as "yield," this is the average cost paid by a paying passenger to fly one mile, which is a measure of revenue production and fares.

(g) RASM (unit revenue) - Operating revenue yield per ASM, calculated as operating revenue divided by available seat miles. Also referred to as "operating unit revenue," this is a measure of operating revenue production based on the total available seat miles flown during a particular period.

(h) PRASM (Passenger unit revenue) - Passenger revenue yield per ASM, calculated as passenger revenue divided by available seat miles. Also referred to as "passenger unit revenue," this is a measure of passenger revenue production based on the total available seat miles flown during a particular period.

(i) CASM (unit costs) - Operating expenses per ASM, calculated as operating expenses divided by available seat miles. Also referred to as "unit costs" or "cost per available seat mile," this is the average cost to fly an aircraft seat (empty or full) one mile, which is a measure of cost efficiencies.

Non-GAAP ROIC, pre-tax (A/D)	4.8 %	4.8 %
Non-GAAP ROIC, after-tax (C/D)	3.8 %	3.7 %

(a) Net adjustment to reflect all aircraft in fleet as owned (i.e., the impact of eliminating aircraft rent expense and replacing with estimated depreciation expense for those same aircraft). The Company makes this adjustment to enhance comparability to other entities that have different capital structures by utilizing alternative financing decisions.

(b) Calculated as an average of the five most recent quarter end balances or remaining obligations. The Net present value of aircraft operating leases represents the assumption that all aircraft in the Company's fleet are owned, as it reflects the remaining contractual commitments discounted at the Company's estimated incremental borrowing rate as of the time each individual lease was signed.

(c) The Equity adjustment in the denominator adjusts for the cumulative impacts, in Accumulated other comprehensive income and Retained earnings, of gains and/or losses that will settle in future periods, including those associated with the Company's fuel hedges. The current period impact of these gains and/or losses is reflected in the Net impact from fuel contracts in the numerator.

(d) The GAAP twelve month rolling tax rate as of March 31, 2025, was 22.3 percent, and the Non-GAAP twelve month rolling tax rate was 23.1 percent. See Note Regarding Use of Non-GAAP Financial Measures for additional information.

(e) The GAAP twelve month rolling tax rate as of March 31, 2024, was 27.1 percent, and the Non-GAAP twelve month rolling tax rate was 23.5 percent. See Note Regarding Use of Non-GAAP Financial Measures for additional information.

NOTE REGARDING USE OF NON-GAAP FINANCIAL MEASURES

The Company's unaudited Condensed Consolidated Financial Statements are prepared in accordance with accounting principles generally accepted in the United States ("GAAP"). These GAAP financial statements may include (i) unrealized noncash adjustments and reclassifications, which can be significant, as a result of accounting requirements and elections made under accounting pronouncements relating to derivative instruments and hedging and (ii) other charges and benefits the Company believes are unusual and/or infrequent in nature and thus may make comparisons to its prior or future performance difficult.

As a result, the Company also provides financial information in this release that was not prepared in accordance with GAAP and should not be considered as an alternative to the information prepared in accordance with GAAP. The Company provides supplemental non-GAAP financial information (also referred to as "excluding special items"), including results that it refers to as

"economic," which the Company's management utilizes to evaluate its ongoing financial performance and the Company believes provides additional insight to investors as supplemental information to its GAAP results. The non-GAAP measures provided that relate to the Company's performance on an economic fuel cost basis include Total operating expenses, non-GAAP; Operating expenses, non-GAAP excluding Fuel and oil expense; Operating expenses, non-GAAP excluding Fuel and oil expense and profit sharing; Operating loss, non-GAAP; Adjusted Operating income, non-GAAP; Other (gains) losses, net, non-GAAP; Loss before income taxes, non-GAAP; Benefit for income taxes, net, non-GAAP; Net loss, non-GAAP; Net loss per share, diluted, non-GAAP; and Operating expenses per ASM, non-GAAP, excluding Fuel and oil expense and profit sharing (cents). The Company's economic Fuel and oil expense results differ from GAAP results in that they only include the actual cash settlements from fuel hedge contracts - all reflected within Fuel and oil expense in the period of settlement. Thus, Fuel and oil expense on an economic basis has historically been utilized by the Company, as well as some of the other airlines that utilize fuel hedging, as it reflects the Company's actual net cash outlays for fuel during the applicable period, inclusive of settled fuel derivative contracts. Any net fuel hedging premium costs paid related to option contracts that are designated as hedges are reflected as a component of Fuel and oil expense, for both GAAP and non-GAAP (including economic) purposes in the period of contract settlement. The Company believes these economic results provide further insight into the impact of the Company's fuel hedges on its operating performance and liquidity since they exclude the unrealized, noncash adjustments and reclassifications that are recorded in GAAP results in accordance with accounting guidance relating to derivative instruments, and they reflect all cash settlements related to fuel derivative contracts within Fuel and oil expense. This enables the Company's management, as well as investors and analysts, to consistently assess the Company's operating performance on a year-over-year or quarter-over-quarter basis after considering all efforts in place to manage fuel expense. However, because these measures are not determined in accordance with GAAP, such measures are susceptible to varying calculations, and not all companies calculate the measures in the same manner. As a result, the aforementioned measures, as presented, may not be directly comparable to similarly titled measures presented by other companies.

Further information on (i) the Company's fuel hedging program, (ii) the requirements of accounting for derivative instruments, and (iii) the causes of hedge ineffectiveness and/or mark-to-market gains or losses from derivative instruments is included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2024.

The Company's GAAP results in the applicable periods may include other charges or benefits that are also deemed "special items," that the Company believes make its results difficult to compare to

prior periods, anticipated future periods, or industry trends. Financial measures identified as non-GAAP (or as excluding special items) have been adjusted to exclude special items. For the periods presented, in addition to the items discussed above, special items include:

1. Incremental expense associated with contract ratification bonuses for various workgroups related to additional compensation for services performed by Employees outside the applicable fiscal period;
2. Charges associated with tentative litigation settlements regarding paid short-term military leave to certain Employees, certain California state meal-and-rest break regulations for Flight Attendants, and an arbitration award in favor of the Company's Pilots relating to a collective-bargaining matter;
3. Expenses associated with professional advisory fees related to the Company's implementation of its comprehensive transformational plan;
4. Charges associated with severance, post-employment benefits, and professional fees as a result of the Company's reduction in workforce;
5. Reversal of breakage revenue recorded in prior years related to a portion of flight credits issued to Customers during 2022 and prior that have either been redeemed or are expected to be redeemed in future periods. The majority of these flight credits were issued during the COVID-19 pandemic as the Company was making significant changes to its flight schedules based on fluctuating demand, which made it difficult to estimate future redemption patterns when compared against historical Customer behavior;
6. Incremental expense associated with a voluntary separation program that allowed eligible Employees the opportunity to voluntarily separate from the Company in exchange for severance, medical/dental coverage for a specified period of time, and travel privileges based on years of service;
7. Expenses associated with incremental professional advisory fees related to activist investor activities, which were not budgeted by the Company or associated with the ongoing operation of the airline; and
8. A charge associated with a settlement reached with the DOT as a result of the Company's December 2022 operational disruption.

Because management believes special items can distort the trends associated with the Company's ongoing performance as an airline, the Company believes that evaluation of its financial performance can be enhanced by a supplemental presentation of results that exclude the impact of special items in order to enhance consistency and comparativeness with results in prior periods that do not include such items and as a basis for evaluating operating results in future periods. The following measures are often provided, excluding special items, and utilized by the Company's

management, analysts, and investors to enhance comparability of year-over-year results, as well as to industry trends: Total operating expenses, non-GAAP; Operating expenses, non-GAAP excluding Fuel and oil expense; Operating expenses, non-GAAP excluding Fuel and oil expense and profit sharing; Operating loss, non-GAAP; Adjusted Operating income, non-GAAP; Other (gains) losses, net, non-GAAP; Loss before income taxes, non-GAAP; Benefit for income taxes, net, non-GAAP; Net loss, non-GAAP; Net loss per share, diluted, non-GAAP; and Operating expenses per ASM, non-GAAP, excluding Fuel and oil expense and profit sharing (cents).

The Company has also provided its calculation of return on invested capital, which is a measure of financial performance used by management to evaluate its investment returns on capital. Return on invested capital is not a substitute for financial results as reported in accordance with GAAP and should not be utilized in place of such GAAP results. Although return on invested capital is not a measure defined by GAAP, it is calculated by the Company, in part, using non-GAAP financial measures. Those non-GAAP financial measures are utilized for the same reasons as those noted above for Net loss, non-GAAP and Operating loss, non-GAAP. The comparable GAAP measures include charges or benefits that are deemed "special items" that the Company believes make its results difficult to compare to prior periods, anticipated future periods, or industry trends, and the Company's profitability targets and estimates, both internally and externally, are based on non-GAAP results since "special items" cannot be reliably predicted or estimated. The Company believes non-GAAP return on invested capital is a meaningful measure because it quantifies the Company's effectiveness in generating returns relative to the capital it has invested in its business. Although return on invested capital is commonly used as a measure of capital efficiency, definitions of return on invested capital differ; therefore, the Company is providing an explanation of its calculation for non-GAAP return on invested capital in the accompanying reconciliation in order to allow investors to compare and contrast its calculation to the calculations provided by other companies.

ABOUT SOUTHWEST AIRLINES CO.

[Southwest Airlines Co.](#) operates one of the world's most admired and awarded airlines, offering its one-of-a-kind value and Hospitality at 119 airports across 11 countries. Southwest took flight in 1971 to democratize the sky through friendly, reliable, and low-cost air travel and now carries more air travelers flying nonstop within the United States than any other airline¹. By empowering its more than 72,000² People to deliver unparalleled Hospitality, the maverick airline cherishes a passionate

loyalty among more than 134 million Customers carried in 2025. Southwest leverages a unique legacy and mission to serve communities around the world including harnessing the power of its People and Purpose to put communities at the Heart of its success. Learn more by visiting Southwest.com/citizenship.

1. Based on U.S. Dept. of Transportation quarterly Airline Origin & Destination Survey as of Q2 2025
2. Fulltime-equivalent active Employees as of Dec. 31, 2025
